

## **Screening**

### **Rejectsorter RS1, RS2**

# Rejectsorter RS1, RS2

## Applications

- Tail screening
  - consistency range 3 - 5 %  
(stock preparation)
  - consistency range 1 - 2 %  
(stock preparation, approach flow system)
- Mainl flow screening  
(for low production rates)

## Features

- High screening efficiency
- Suitable for high inlet consistencies and high concentrations of contaminants
- High reject dry content

## Technical data

Size		RS1	RS2
Max. throughput	t/24h	15	30
Max. motor load	kW	30	45
Screen perforation - ø	mm	1.8 - 4.0	
Inlet consistency	%	1.0 - 5.5	
Reject consistency	%	10.0 - 30.0	
Flushing water	l/min	100	100
Number of rotors		1	1
